When determining the impact on the company's shareholders, we will consider the impact from three aspects: (1) the impact on the holding company; (2) the impact on the stock price; And (3) the impact on earnings per share, in which the calculation of the impact on this stock issue will be divided into three cases, and the summary of each case is as follows.

Scenario	Issuance and Offering of Warrant PANEL-W1	Issuance and Offering of Warrant PANEL-W2	Control Dilution (%)	Price Dilution (%)	EPS Dilution (%)
Case 1	✓	-	20.00	0.45	25.00
Case 2	-	✓	11.11	-19.55	12.50
Case 3	✓	✓	27.27	-15.79	25.00

8.1 Control Dilution

(A) After the issuance and offering of warrants PANEL-W1 to existing shareholders. (Case 1)

In the event that existing shareholders exercise their conversion rights for all of the PANEL-W1 warrants, there will be no impact on the reduction of their shareholding proportion, as the warrants were allocated to existing shareholders of the Company in proportion to their shareholdings and were not offered for sale to shareholders that would create obligations for the Company under foreign laws. However, if a person who is not an existing shareholder fully exercises their rights to purchase shares under all of the PANEL-W1 warrants (resulting from the transfer of warrants received by existing shareholders to a non-existent shareholder), the existing shareholder's shareholding proportion will decrease by 20.00%, with the following calculation details:

Since the warrants are issued and offered for sale to existing shareholders in proportion to their shareholding, there is no impact on shareholders as of the date the warrants are issued. However, if the warrants are fully exercised by individuals other than existing shareholders, there will be a dilution effect on existing shareholders as follows:

$$\begin{aligned}
 \text{Control dilution} &= \frac{\text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1}}{\text{(Paid-up Stock + Number of Shares Reserved for the Exercise of the Warrant PANEL-W1)}} \\
 &= \frac{47,500,000}{(190,000,000 + 47,500,000)} \\
 &= 20.00\%
 \end{aligned}$$

(B) After the issuance and offering of the warrants to the original shareholders (Case 2)

In the event that existing shareholders exercise their conversion rights for all of their PANEL-W2 warrants, there will be no impact on the reduction of their shareholding proportion, as the warrants were allocated to existing shareholders of the Company in proportion to their shareholdings and were not offered for sale to shareholders that would create obligations for the Company under foreign laws. However, if a person who is not an existing shareholder fully exercises their rights to purchase shares according to the warrants (resulting from the transfer of warrants received by existing shareholders to

a non-existent shareholder), the existing shareholder's shareholding proportion will decrease by 11.11%, with the following calculation details:

$$\begin{aligned}
 \text{Control dilution} &= \frac{\text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W2}}{(\text{Paid-up Stock} + \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W2})} \\
 &= \frac{23,750,000}{(190,000,000 + 23,750,000)} \\
 &= 11.11\%
 \end{aligned}$$

(C) After the issuance and offer of the Rights Certificates PANEL-W1 and PANEL-W2 to the original shareholders (Case 3)

In the event that the warrants PANEL-W1 and PANEL-W2 are exercised, the shareholding proportion of the company's existing shareholders will decrease by 27.27%. The calculation details are as follows:

$$\begin{aligned}
 \text{Control dilution} &= \frac{\text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1} + \text{PANEL-W2}}{(\text{Paid-up Stock} + \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1} + \text{PANEL-W2})} \\
 &= \frac{47,500,000 + 23,750,000}{(190,000,000 + 47,500,000 + 23,750,000)} \\
 &= 27.27\%
 \end{aligned}$$

8.2 Price Dilution

(A) After the issuance and offering of warrants PANEL-W1 to existing shareholders. (Case 1)

After issuing and offering the PANEL-W1 shares to the original shareholders of the Company in proportion to the shareholding, without offering to the shareholders that make the Company liable under foreign law. If the shareholders who have received the PANEL-W1 shares have the right to change their status to ordinary shares in accordance with the amount of rights granted. There will be no effect on the market price of the share (Price Dilution), but in the event that the shareholder who received the PANEL-W1 bond does not exercise the right to change the status and other shareholders exercise the right to change the status in full, there will be an effect on the market price of the maximum share equal to 0.45 percent, with the calculation details as follows:

$$\begin{aligned}
 \text{Price dilution} &= \frac{\text{Market Price Before the Offering} - \text{Market Price After the Offering}}{\text{Market Price Before the Offering}} \\
 \text{Market Price Before the Offering} &= \text{the weighted average closing price of the Company's shares over the 15 trading days prior to the Board of Directors' Meeting No.1/2026 on 23 February 2026 (i.e., from 2 to 20 February 2026)}
 \end{aligned}$$

$$\begin{aligned}
\text{Market Price After the Offering} &= \frac{(\text{Market Price Before the Offering} \times \text{Paid-up Stock}) + (\text{Exercise Price of PANEL-W1} \times \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1})}{\text{Paid-up Stock} + \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1}} \\
&= \frac{(1.33 \times 190,000,000) + (1.30 \times 47,500,000)}{190,000,000 + 47,500,000} \\
&= 1.32 \text{ Baht} \\
\text{Price dilution} &= \frac{\text{Market Price Before the Offering} - \text{Market Price After the Offering}}{\text{Market Price Before the Offering}} \\
&= \frac{1.33 - 1.32}{1.33} \\
&= 0.45\%
\end{aligned}$$

(B) After the issuance and offer of the Rights Issue Warrants to the original shareholders (Case 2)

After the issuance and offer of the PANEL-W2 warrants to the company's original shareholders in proportion to their shareholding, without offering them to shareholders who would impose foreign legal obligations on the company, if the shareholders receiving the PANEL-W2 warrants exercise their conversion rights in full, it will not affect the market price of the shares (Price Dilution). However, in the event that the shareholders receiving the PANEL-W2 warrants do not exercise their conversion rights, and other shareholders fully exercise their conversion rights, the maximum impact on the market price of the shares will be a reduction of 19.55%. The detailed calculation is as follows.

$$\begin{aligned}
\text{Price dilution} &= \frac{\text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W2} \times (\text{Exercise Price of Warrant PANEL-W2} - \text{Market Price Before the Offering})}{\text{Paid-up Stock} + \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W2}}
\end{aligned}$$

Market Price Before the Offering = the weighted average closing price of the Company's shares over the 15 trading days prior to the Board of Directors' Meeting No.1/2026 on 23 February 2026 (i.e., from 2 to 20 February 2026)

$$\begin{aligned}

&= \frac{(1.33 \times 190,000,000) + (3.68 \times 23,750,000)}{190,000,000 + 23,750,000} \\
&= 1.59 \text{ Baht}
\end{aligned}$$

$$\begin{aligned}
\text{Price dilution} &= \frac{\text{Market Price Before the Offering} - \text{Market Price After the Offering}}{\text{Market Price Before the Offering}} \\
&= \frac{1.33 - 1.59}{1.33} \\
&= -19.55\%
\end{aligned}$$

(C) After the issuance and offering of the Rights Certificates PANEL-W1 and PANEL-W2 to the original shareholders (Case 3).

After the issuance and offer of the Warrant PANEL-W1 and Warrant PANEL-W2 to the existing shareholders of the Company in proportion to their shareholding without offering them to shareholders who make the Company subject to foreign laws, if the shareholders who receive the Warrant PANEL-W1 and Warrant PANEL-W2 fully exercise their conversion rights, it will not affect the market price of the shares (Price Dilution). However, in the event that the shareholders who receive the Warrant PANEL-W1 and Warrant PANEL-W2 do not exercise their conversion rights, while other shareholders fully exercise their conversion rights, the maximum impact on the market price of the shares will be a reduction of 15.79%, with the detailed calculation as follows.

$$\begin{aligned}
\text{Price dilution} &= \frac{\text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1 + PANEL-W2}}{\text{(Paid-up Stock + Number of Shares Reserved for the Exercise of the Warrant PANEL-W1 + PANEL-W2)}} \\
\text{Market Price Before the Offering} &= \text{the weighted average closing price of the Company's shares over the 15 trading days prior to the Board of Directors' Meeting No.1/2026 on 23 February 2026 (i.e., from 2 to 20 February 2026)} \\
\text{Market Price After the Offering} &= \frac{(\text{Market Price Before the Offering} \times \text{Paid-up Stock}) + (\text{Exercise Price of PANEL-W1} \times \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1}) + (\text{Exercise Price of PANEL-W2} \times \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W2})}{\text{Paid-up Stock + Number of Shares Reserved for the Exercise of the Warrant PANEL-W1 + Number of Shares Reserved for the Exercise of the Warrant PANEL-W2}} \\
&= \frac{(1.33 \times 190,000,000) + (1.30 \times 47,500,000) + (3.68 \times 23,750,000)}{190,000,000 + 47,500,000 + 23,750,000} \\

$$= \frac{1.33 - 1.54}{1.33}$$

$$= -15.79\%$$

8.3 Earnings Per Share Dilution: EPS Dilution

(A) After the issuance and offering of warrants PANEL-W1 to existing shareholders. (Case 1)

After issuance and offering of PANEL-W1 warrants to existing shareholders of the Company in proportion to their shareholdings, without offering them to shareholders that would create obligations for the Company under foreign laws, if shareholders who received PANEL-W1 warrants fully exercise their conversion rights into ordinary shares, there will be no impact on earnings per share dilution. However, if shareholders who received PANEL-W1 warrants do not exercise their conversion rights, and other shareholders fully exercise their conversion rights, the existing shareholders will be affected by an earnings per share dilution of 25.00% compared to the total issued shares of the Company at present. The calculation details are as follows:

$$\text{EPS dilution} = \frac{\text{EPS Before the Offering} - \text{EPS After the Offering}}{\text{EPS Before the Offering}}$$

$$\begin{aligned} \text{EPS Before the Offering} &= \frac{\text{Net Profit of the Company}}{\text{Paid-up Stock}} \\ &= \frac{15,093,146.00}{190,000,000} \end{aligned}$$

$$= 0.08 \text{ Baht per Share}$$

$$\begin{aligned} \text{EPS After the Offering} &= \frac{\text{Net Profit of the Company}}{(\text{Paid-up Stock} + \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W1})} \end{aligned}$$

$$= \frac{15,093,146.00}{(190,000,000 + 47,500,000)}$$

$$= 0.06 \text{ Baht per Share}$$

$$\begin{aligned} \text{EPS dilution} &= \frac{\text{EPS Before the Offering} - \text{EPS After the Offering}}{\text{EPS Before the Offering}} \end{aligned}$$

$$= \frac{0.08 - 0.06}{0.08}$$

$$= 25.00\%$$

Remark: The net profit of the Company refers to the net profit of the shareholders for the four previous quarters ("Net Profit") from January 1, 2025 to December 31, 2025, which is a net profit equal to THB 15,093,146.00.

(B) After the issuance and offer of the Rights Issue Warrants to the original shareholders (Case 2)

After the issuance and offer of the PANEL-W2 warrants to the company's existing shareholders in proportion to their shareholding without offering them to shareholders who cause the company to have foreign legal obligations, if the shareholders who received the PANEL-W2 warrants exercise their conversion rights in full, there will be no impact on earnings per share (EPS dilution). However, in the event that the shareholders who received the PANEL-W2 warrants do not exercise their conversion rights, and other shareholders exercise their conversion rights in full, the existing shareholders will experience a 12.50% dilution in EPS compared to the total number of shares currently issued and outstanding by the company. The detailed calculation is as follows.

$$\begin{aligned}
 \text{EPS dilution} &= \frac{\text{EPS Before the Offering} - \text{EPS After the Offering}}{\text{EPS Before the Offering}} \\
 \text{EPS Before the Offering} &= \frac{\text{Net Profit of the Company}}{\text{Paid-up Stock}} \\
 &= \frac{15,093,146.00}{190,000,000} \\
 &= 0.08 \text{ Baht per share} \\
 \text{EPS After the Offering} &= \frac{\text{Net Profit of the Company}}{(\text{Paid-up Stock} + \text{Number of Shares Reserved for the Exercise of the Warrant PANEL-W2})} \\
 &= \frac{15,093,146.00}{(190,000,000 + 23,750,000)} \\
 &= 0.07 \text{ Baht per share} \\
 \text{EPS dilution} &= \frac{\text{EPS Before the Offering} - \text{EPS After the Offering}}{\text{EPS Before the Offering}} \\
 &= \frac{0.08 - 0.07}{0.08} \\
 &= 12.50\%
 \end{aligned}$$

Remark: The net profit of the Company refers to the net profit of the shareholders for the four previous quarters ("Net Profit") from January 1, 2025 to December 31, 2025, which is a net profit equal to THB 15,093,146.00.

(C) After the issuance and offering of the Rights Certificates PANEL-W1 and PANEL-W2 to the original shareholders (Case 3)

After the issuance and sale of the PANEL-W1 and PANEL-W2 bonds to the original shareholders of the Company in proportion to the shareholding, without offering to the shareholders that make the Company liable under foreign law (Preferential Public Offering – “PPO”), if the shareholder received the PANEL-W1 bond and PANEL-W2 shares have the right to be converted to ordinary shares according to the amount of rights granted. Earnings per share dilution will not be affected. However, in the case of shareholders who have received PANEL-W1 and PANEL-W2 shares, the right to be converted is not exercised. And if other shareholders exercise the right to change the full number of shares, the original shareholders will be affected by the dividend equal to 25.00 percent compared to the total number of shares sold of the Company at present. The calculation details are as follows:

$$\begin{aligned}
 \text{EPS dilution} &= \frac{\text{EPS Before the Offering} - \text{EPS After the Offering}}{\text{EPS Before the Offering}} \\
 \text{EPS Before the Offering} &= \frac{\text{Net Profit of the Company}}{\text{Paid-up Stock}} \\
